XI'AN LIB ENVIRONMENTAL SIMULATION INDUSTRY Climatic Test Chamber Manufacturer and Supplier

Sand Dust Test Chamber

DI-800

TEMPERATURE Ambient \sim +50°C

DUST CONCENTRATION $2\sim 4 \text{kg/m}^3$

BLOWING TIME 0~99H59M

[Technical Parameter]

Model		DI-800	DI-1000		
Internal Dimension (mm)		800*1000*1000	1000*1000*1000		
Overall Dimension (mm)		1040*1450*1960	1200*1450*1960		
Interior Volume (L)		800	1000		
	Temperature Range	Ambient ∼ +50°C			
Parameter	Humidity Range	< 30% RH			
	Normal Wire Diameter	50um			
	Nominal Width of a Gap Between wires	75um			
	Fight Time	0 ~ 99H59M			
	Blowing Time	0 ~ 99H59M			
	Specimen Power Outlet	Dust-proof socket 16A			
	Heating Element	Nichrome heater			
	Vacuum System	Equipped with a pressure gauge, air filter, pressure regulator, connecting tube			
Stru	Controller	Programmable color LCD touch screen controller			
Structure		Ethernet connection, PC Link			
	View Window Size(mm)	475*475			
	Door Lock	Electromagnetic lock			
	Safety Device	Over-temperature Protection; Over-current Protection; Earth Leakage Protection; Phase Sequence Protection			
Material	Exterior Material	A3 Steel Plate with protective coating			
	Interior Material	SUS304 stainless steel			
	Observation Window	Interior lighting, double-layer thermo stability silicone rubber sealing			
Standard Configuration		Sample shelf, dust wiper, talcum powder(5kgs)			
Power Supply		380V 50Hz			
Maximum Noise		65 dBA			
E	nvironmental Conditional	5℃~+35 ℃ ≤85% RH			
	Standard	IEC 60529, IS	IEC 60529, ISO 20653		

Standard & customized

* pay attention to the environmental condition during installing

Sand and Dust Test Chamber

1.Workroom

The internal material is 304 stainless steel, mirror surface, rust-proof, high temperature and corrosion resistance; Nice ruggedness and long life.

2.Sample Shelf

- Sample shelf is made of stainless steel, its standard load 50 kgs.
- Can custom-make special shelf for heavy samples. Mesh sieve size is 450*450mm.

3. Build-in lighting

The built-in dustproof LED lighting inside the workroom makes it clear to observe the test specimen. The light can be turned on and off at the control panel button.

4.Viewing Window

Double-layer tempered glass, specially designed seal, with good impact resistance and prevention of sand and dust leakage.

5.Controller

PID programmable color touch screen controller, network connection computer.

Can edit 120 programs 20 segment.

LIB also can preset program into the controller based on user testing requirements.

The set system language is English for standard.

6.Electromagnetic Lock

Door lock is an electromagnetic lock, which will generate a strong suction force and tightly attract the iron plate to lock the door

Unlocking is operated on the controller for safety and

7.Castor

Install 4 castors for ease moving, and with brakes function. Caster height adjustable.

8.Internal Power Supply

The workroom is equipped with a single-phase 16A internal power interface (positive and negative terminals) to power up the test specimen. The power-on time and cycle can be controlled by the controller.

9.Vacuum Pump

Vacuum pump is used to evacuate the test sample. There is a vacuum interface in the workroom, which can be directly connected to the sample.

prevent malfunction.

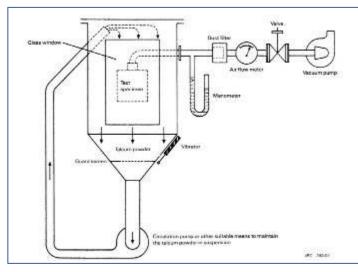

10.External Materials

A3 steel plate with galvanized coating; Electrostatic treatment; High and low temperature corrosion resistance; High hardness, anti - impact Very high safety factor; Color can be customized.

Structures

Core Function

Dust Circulation System

Test chamber with vertical circulating airflow. The bottom of the air duct is connected to the V-shaped hopper interface. The air inlet and outlet of the fan are directly connected to the air duct.

The diffuser opening on the top of the workroom is connected to the workroom to form a vertical dust circulation system. Airflow can smoothly blow dust into the working room, forming a dust blowing circulation system. Dust can be recycled use.

Controller System

The PID controller as the main control unit to command, operate, detect and redistribute the various components of the equipment to achieve maximum effective use.

Screen display function: LCD display, which can display test conditions

Heating System

Nichrome heater is used to heat the temperature of the working room to 45 $^{\circ}$ C. The heater is installed under the mesh sieve, which is the indispensable channel for the return of sand and dust to dry the talcum powder.

Voltage 380V 50Hz 3 phase. L1, L2, L3, PE, N, grounding protection. Standard 2m long cable,

Over Temperature Protection

Over Current Protection Phase Sequence Protection Earth Leakage Protection

Protection System

Option

Cable Wire	 2.5m 3m
Controller	 WiFi connection Mobile APP control Multi-language controller interface: Russian, French, Polish, Romanian, German
Interface	■ USB
Talcum Powder	 45µm talcum powder If buy powder with machine, MOQ is 10kgs, otherwise it is 500kgs.

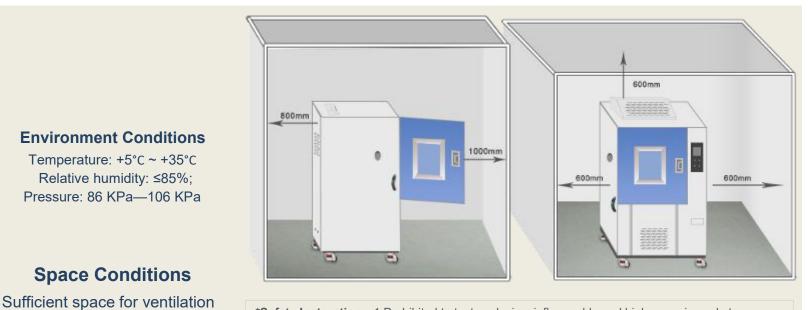

Shipping & Packaging

Relative humidity: $\leq 85\%$;

Space Conditions

Install Condition

*Safety Instruction: 1. Prohibited to test explosive, inflammable and high corrosive substance 2. Chemical exposure to the equipment is prohibited 3.Equipment must be safety on the ground to avoid electrostatic induction

Packaging

First, seal chamber with waterproof plastic film. Protect chamber from seawater corrosion. Second, buffer foam is placed in the four corners of the chamber. It is used for fixing equipment to prevent shaking and damaging chamber during transportation.

Plywood: standard wood export packaging. The wooden box is fixed by sheet metal to prevent damage during transportation.

Gross weight: 457kgs~ Package size: 1620*1250*2070 mm

Warranty Condition

Our company will repair the product, if the product, the material of the parts, the design and manufacturing of the products raised hardware problems caused by product itself rather than human error within three years warranty period since the date of dispatching by the customer. Our company repairs the products, but will collect the basic costs of the spare parts after the warranty period, but service is free always.

Shipping

Material: Export standard wooden box *Can be used for Sea, Air, Railway, Truck and multimodal transport.

Warranty & Service

- 3 Years Warranty, Lifelong Follow-up Services

Professional After-sales Team If you have any questions during operation, we will supply solution to you with 24 hours.

How to Service

1. At first, our test chambers are produced based on 20 years product lifetime.

Normally once test chambers have problems, we judge the problems, and send spare parts to our customers, and teach them how to change new parts on by email or video, all spare parts and shipping cost (by DHL, TNT, and FedEx) paid by LIB.

2. If the customer needs our engineer on-site service, they only need pay the ticket accommodation to our Engineers, service is for free.

3. If products still can't use after our engineers repair, we will produce a new test chamber (same as the old one) to our customers with no charge.

PROVIDING TEST SOLUTION, PROVIDING TEST EQUIPMENT

Xi'an LIB Environmental Simulation Industry is a lead provider of environmental test chamber in China, with its own brand (LIB) design, production, sales and service since 2009. We continually update technology and develop new products for customer's needs.

Our main products included temperature and climate test chambers, corrosion chambers, weathering testers, IP dust and rain chambers, ozone test chamber, noxious gas SO2 H2S chamber, walk-in chambers. We provide test chamber, we provide test solution. Standard and customized products to meet different customer needs.

By 2018, global market has spread to 53 countries to USA, Canada, <u>Mexico, Brazil, Peru, Russia,</u> German.UK.France.Finland.Netherlands. Poland, Switzerland, Thailand, Philippines, Singapore, Malaysia, Australian, South Africa etc. and the market continues to expand.

At present 7 Tier-one agents around the world provide LIB products, installation and maintenance service for customers. Make things simple and convenient.
